

Finish the year strong in Quality

Pyx Health 'Fast Start' Quality Program

The impact of finding and engaging lonely, disconnected, and isolated seniors has been recognized and clinically proven. Pyx Health has perfected an engagement model that has shown users feel more connected to their health plans, and that using the service has prevented trips to the ER or calling 911 (see our [Medicare population report](#)).

We're offering our easy-to-use application and human-powered connection program to strategically target Star and HEDIS measures. Members get the personalized, compassionate intervention and education needed to move the needle on challenging health care issues, leading to outcomes like the claims-based 2.5:1 ROI we are achieving with our current Medicare Advantage clients.

Members

Cost

Up to 20,000	\$1.96 PMPM
20,001 – 50,000	\$1.85 PMPM
50,000+	Custom program design and metrics

Pyx Health has enterprise MSA / BAA agreements in place with almost all national plans.

Target up to 4 unique gaps

-  Annual wellness visits with current or net new primary care providers
-  Measure C01 – breast cancer screening
-  Measure C03 – annual flu vaccine
-  Measure C09 – C11 with focus on diabetes-specific education
-  Measure C15 – statin therapy for those with cardiovascular disease

"If this helps even 100 of our 7,000 members, I can sleep well knowing we spent that money well."

COO, Pyx Health partner

ABOUT PYX HEALTH

Since 2017 | Female founded and led | 6.1 million covered lives | 70+ health plans | Avg. 48% loneliness reduction

Pyx Health is a tech-enabled services company that provides health insurance plans and their members an innovative, scalable solution that effectively addresses the nation's critical loneliness epidemic. Pyx Health uses easy-to-use technology with a human 'hug' and science-based activities to deliver timely, meaningful help to reduce loneliness and improve health.
